MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY REVIEW

For the six months ended 30 June 2017 (the “Period”), the global economy experienced modest recovery under a backdrop of a number of uncertainties. While advanced economies experienced an overall smooth recovery, the trend of emerging markets and developing economies continued to become divided, where China continued to lead in its growth. For the first half of 2017, the economic structural adjustment continued to be optimized in the PRC, the effectiveness of the structural reform of the supply side had gradually become evident, GDP growth amounted to 6.9% year-on-year and the national economy displayed stability and improvement.

According to the statistics provided by IDC, a globally recognized market research institution, global smartphone shipments increased by 1.5% year on year to 689 million units in the first half of 2017 and the growth rate slightly rebounded from the same period last year. Although the overall growth rate was still low, high-end smartphone demand remained robust, bringing structural opportunities for the industry.

In China, the smartphone market was saturated and the market competition was increasingly intense. In the first half of 2017, smartphone shipments fell for the first time year on year. According to data released by the China Information and Communications Research Institute, China’s mobile phone shipments in the first half of 2017 was 239 million units, down 5.9% year on year. Among them, smartphone shipments fell 3.9% to 226 million units. However, product competitiveness of domestic mobile phone brands continued to improve by accurately grasping the consumer preferences and the overall advantages of product performance and the market share reached 90.5% during the Period. In the first half of 2017, among the top five mobile phone brands in the global smartphone sales, three of them were China’s own brands and the global mobile phone market presented a new pattern.

Regarding the use of materials, with rising consumer demand for smartphone aesthetics, the metal casings and metal frames have become increasingly popular among consumers due to the beautiful, thin, sensitive touch and other advantages, and have gradually become the mainstream choice for the mid-and high-end smartphones. During the Period, metal parts were widely used in mobile intelligent terminals and consumer electronics products; the market penetration continued to rise and the market size experienced constant expansion. Suppliers who have comprehensive technologies and a base of diverse customers have great opportunity for development.

BUSINESS REVIEW

BYD Electronic (International) Company Limited (“BYD Electronic” or the “Company”) and its subsidiaries (collectively referred to as the “Group”) is a supplier of handset components and assembly services in China with leading technological strengths and cost competitiveness. The Company adopts an operating strategy of providing one-stop services with vertical integration capabilities, and provides handset manufacturers of different brands with various services including the manufacture of handset components and handset design and assembly services. It also provides such services as product design, parts manufacturing and assembly for manufacturers of other electronic products. During the Period, the Group’s revenue increased by approximately 13.18% year on year to approximately RMB17,526 million, and profit attributable to the shareholders of the Company increased by approximately 118.97% year on year to approximately RMB1,322 million as compared with the same period of 2016.

In the first half of 2017, metal parts continued to be popular among consumers. Many domestic and foreign smartphone brand manufacturers have increased the use of metal casings and metal frame, and applied them to more mobile intelligent terminal products. The market capacity of metal parts continued to improve to promote the Group’s metal parts orders constantly growing. During the Period, the Group continued to maintain close business relationship with leading handset brands in both domestic and overseas markets and successively received orders from several high-end flagship models to promote the constant growth of income from metal parts business and the continuous improvement of the Group’s industry status. At the same time, the Group increased production capacity, improved production efficiency and yield levels; metal parts business profitability has also been significantly improved to promote the Group’s earnings to achieve significant growth. During the Period, the Group’s income from the metal parts business increased significantly by 26.49% to RMB6 billion.

MANAGEMENT DISCUSSION AND ANALYSIS

Regarding the use of materials, the Group grasped the latest trends in the development of the industry, and actively invested resources in the research and development of new materials and technologies, including 3D glass and ceramics, to be fully prepared for a wide range of product needs of customers. Some smartphones began to use 3D glass as casing based on the considerations of wireless charging and radio frequency signals. In the face of new market demand, the Group actively expanded the 3D glass casing production capacity during the Period to broaden the sources of revenue and profit with more abundant product lines.

During the Period, the Group's assembly business achieved good development, continued to receive smartphone EMS orders from the leading brand manufacturers, and actively expanded new business field. As a global leader in the design, component production and assembly of consumer electronics products, the Group has expanded its business scope from mobile intelligent terminals to automotive electronics, unmanned aerial vehicles and other intelligent hardware business in a bid to add new impetus to its sustainable development.

FUTURE STRATEGY

Looking into the second half of the year, the global economic growth situation is still full of uncertainty. China's constant supply side structural reform has achieved initial success and the national economy is expected to hold steady with continuous positive momentum. With the global economic recovery and emerging market growth, as well as the launch of more new smartphones, IDC predicts that the global smartphone shipments year-on-year growth rate is expected to reach 3.0% at the end of 2017.

In the field of smartphones, metal parts are expected to remain the mainstream of the industry trend and penetration will continue to improve. In the second half of the year, the Group will continue to expand the application scope of metal parts to promote the continuous growth of the metal parts business. In addition, in order to meet the market demand for the diversified appearance of mobile phones, the Group will actively expand new products, including glass, ceramics, and new technologies, improve product yield and expand production capacity to become the world's leading supplier of 3D glass casings and provide customers with more diversified solutions.

Looking ahead, the Group will continue to maintain solid relationships with the existing well-known mobile phone brands in both domestic and overseas markets in order to gain more parts and assembly business orders and seek more diversified business cooperation in the smartphone industry chain. On the other hand, the Group will continue to develop new customer in both domestic and overseas markets so as to optimize the customer structure while broadening the income and enhance market share. At the same time, the Group will set up efforts to develop the market, and actively develop automotive electronics, unmanned aerial vehicles and other smart hardware business so as to foster new growth drivers for its sustainable development going forward.

BYD Electronic will adhere to its core values and positioning, firmly grasp the opportunities for the development of the industry, consolidate and deepen the strategic cooperation with the existing partners in both domestic and overseas markets, accelerate its technological innovation and improve product competitiveness to provide customers with cost-effective innovative products. At the same time, it will continue to increase production capacity and exert the cost advantage to lay a solid foundation for its long-term development with an aim to generate good returns to shareholders.

FINANCIAL REVIEW

During the Period, the increase in revenue was mainly due to the growth in metal component and assembly business. Profit attributable to owners of the parent recorded a sharp increase as compared with the same period of the previous year, mainly due to the increase in the income from and the improvement of profitability of metal components.

MANAGEMENT DISCUSSION AND ANALYSIS

SEGMENTAL INFORMATION

Set out below is a comparison of geographical information by customer locations of the Group for the six months ended 30 June 2017 and 2016:

1H 2017

1H 2016

GROSS PROFIT AND MARGIN

The Group's gross profit for the Period increased by approximately 70.90% to approximately RMB2,114 million. Gross profit margin increased from approximately 7.99% in the first half of 2016 to approximately 12.06% during the Period. The increase in gross profit margin was mainly due to the increase in proportion to revenue and earnings of metal components.

LIQUIDITY AND FINANCIAL RESOURCES

During the Period, the Group recorded cash inflow in operations of approximately RMB465 million, compared to approximately RMB1,233 million of cash inflow recorded in the first half of 2016. During the Period, funds were obtained from the net cash derived from the Company's operations.

The Company possessed sufficient liquidity to meet the daily liquidity management and capital expenditure requirements and control internal operating cash flows. For the six months ended 30 June 2017, the turnover days of trade and bills receivables were approximately 86 days, while the turnover days were approximately 80 days for the six months ended 30 June 2016, mainly due to the increase in the average trade and bills receivables in the same period higher than the increase in revenue in the same period. Inventory turnover days decreased from approximately 52 days for the six months ended 30 June 2016 to approximately 47 days for the Period, mainly due to the increase in sales cost in the same period higher than the increase in the average stock in the same period.

CAPITAL STRUCTURE

The duty of the Company's financial division is to oversee the Company's financial risk management, and to operate in accordance with the policies approved and implemented by the senior management. As at 30 June 2017, the Group did not have any bank borrowings and its cash and cash equivalents were mainly held in Renminbi and US dollars. The Group's current bank deposits and cash balances as well as the Group's credit facilities and net cash generated from operating activities will be sufficient to satisfy the Group's material commitments and the requirements for working capital, capital expenditure, business expansion, investments and expected debt repayment needs for at least the next twelve months.

The Group monitors capital using a gearing ratio, which is net debt divided by equity. The Group's policy is to maintain the gearing ratio as low as possible. Net debt includes interest-bearing bank borrowings, less cash and bank balances. Equity represents equity attributable to owners of the parent. As the Group did not have any interest-bearing bank borrowings, the gearing ratio was zero as at 30 June 2017 and 31 December 2016.

EXPOSURE TO FOREIGN EXCHANGE RISK

The majority of the Group's income and expenses are settled in Renminbi and US dollars. During the Period, the Group did not encounter any significant difficulties or come under any impact on its operations or liquidity due to fluctuations in currency exchange rates. The directors believe that the Group will have sufficient foreign exchange to meet its foreign exchange requirements.

EMPLOYMENT, TRAINING AND DEVELOPMENT

As at 30 June 2017, the Group had approximately 72,000 employees. During the Period, total staff cost accounted for approximately 14.73% of the Group's revenue. Employee remuneration is determined on the basis of the employees' performance, qualification and prevailing industry practices, with compensation policies being reviewed on a regular basis. Bonuses and commissions may also be awarded to employees based on their annual performance appraisal. In addition, incentives may be offered for personal drive and encouragement.

SHARE CAPITAL

As at 30 June 2017, the share capital of the Company was as follows:

Number of issued shares: 2,253,204,500.

CAPITAL COMMITMENTS

As at 30 June 2017, the Company had capital commitments of approximately RMB533 million (31 December 2016: approximately RMB476 million).

CONTINGENT LIABILITIES

Please refer to note 14 to the interim condensed consolidated financial statements for details of contingent liabilities.

The trade payables are non-interest-bearing and are normally settled within terms of 30 to 120 days.

14. CONTINGENT LIABILITIES

Action in relation to Foxconn

On 11 June 2007, a Hong Kong High Court action (the "June 2007 Action") was commenced by a subsidiary and an affiliate of Foxconn International Holdings Limited (the "Plaintiffs") against the Company and certain subsidiaries of the Group (the "Defendants") for using confidential information alleged to have been obtained improperly from the Plaintiffs. The Plaintiffs discontinued the June 2007 Action on 5 October 2007 with the effect that the June 2007 Action has been wholly discontinued against all the Defendants named in the action and this finally disposed of the June 2007 Action without any liability to the Defendants. On the same day, the Plaintiffs initiated a new set of legal proceedings in the Court (the "October 2007 Action"). The Defendants named in the October 2007 Action are the same as the Defendants in the June 2007 Action, and the claims made by the Plaintiffs in the October 2007 Action are based on the same facts and the same grounds in the June 2007 Action. The remedies sought by the Plaintiffs in the October 2007 Action include an injunction restraining the Defendants from using the alleged confidential information, an order for the disgorgement of profit made by the Defendants through the use of the confidential information, damages based on the loss suffered by the Plaintiffs and exemplary damages. The total damages sought by the Plaintiffs in the October 2007 Action have not been quantified.

On 2 October 2009 the Defendants instituted a counter-action against Foxconn International Holdings Limited and certain of its affiliates for their intervention, by means of illegal measures, in the operations involving the Company and certain of its subsidiaries, collusions, written and verbal defamation, and the economic loss as a result of the said activities.

As at reporting date, the case remains in the process of legal proceedings. With assistance from the Company's legal counsel representing the Company for the case, the Board is of the view that the estimate of ultimate outcome and amount to settle the obligation, if any, of the litigation cannot be made reliably up to date.

NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the Six Months Ended 30 June 2017

17. FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amounts and fair values of the Group's and the Company's financial instruments, other than those with carrying amounts that reasonably approximate to fair values, are as follows:

Group

	Carrying amounts		Fair values	
	30 June 2017 (Unaudited) RMB'000	31 December 2016 (Audited) RMB'000	30 June 2017 (Unaudited) RMB'000	31 December 2016 (Audited) RMB'000
Financial assets				
Loan to the ultimate holding company	400,000	400,000	400,000	400,000

Management has assessed that the fair values of short term deposits, cash and cash equivalents, pledged deposits, trade and bills receivables, trade and bills payables, financial assets included in prepayments, deposits and other receivables, financial liabilities included in other payables, amounts due from/to subsidiaries, amounts due from/to the ultimate holding company and the immediate holding company approximate to their carrying amounts largely due to the short term maturities of these instruments.

The fair values of the loan to the ultimate holding company have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The Group's own non-performance risk for the loan to the ultimate holding company as at 30 June 2017 was assessed to be insignificant.

18. APPROVAL OF INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

These interim condensed consolidated financial statements were approved and authorized for issue by the board of directors on 28 August 2017.
